Observations.

The Apportionment in this Parish has been calculated as a percentage on the Real annual Value of the Land. It will be found that a Charge of £10 0 0 Cent on the annual Value of the Land produces a Sum of Ninety two Pounds eleven Shillings, being the full Amount of the Yearly Composition for the Tithes of the Parish, as per Certificate. Land here also convenant to an Average Charge of 16/7 per Acre.

Dated 17 November 1835

William C. Keating

Commissioner
