## Observations.

The Apportionment of this Parish has been Calculated by a Percentage on the Real Annable Value of the Land, it will be found that a Percentage of 9s 8 equal to £9-12-6 on the Annual Value of every Hundred, yields a Sum of £205-0-0½ Annum, being the Amount of Composition for the entire Parish, and being also equivalent to an average Charge of two Shillings and a fraction ⅌ Acre, — Donore Contains 544-0-4 Nett, and the Average Charge of 1-5¾ ⅌ Acre, produces a Sum of £47-12-0, being a fraction more ⅌ Acre than the Calculation at the Percentage.
