

Rent charge sheet as in this
return, and the tot made
by him was 211:11:1² and
which I received as correct.

But on totting up the same
items for this return, I detected
the mistake for the first
time and the tot should
be 212:11:1² -

The gross annual amount
of Rent charge, after the
deduction of the $\frac{1}{4}$, and
also the deduction by Corn
averages in 1854 should be
£423-5-0 But these rent
charges were arranged

and calculated in
Predecessor's time many
years ago, and I have
no way of ascertaining
how they were calculated
between him & Me

I will thank you
to send me a Receipt
for the return I now
send, and also for
the original Applotment
Book which I now
send thro' the post
with this return -

To the Sec^y.

The Comm^s of
Church Temporalities
- Ireland -

I remain
Y^r obt^t serv^t
